Activities

You can attend 3 SUMP network meetings in your country between 2014 and 2016 which will include:

- Participation of national and international experts
- Case studies
- Knowledge sharing and networking

Meet with your National Focal Point: They are trained in SUMP methodologies and how to guide YOU to develop a strong and effective Sustainable Urban Mobility Plan.

You will receive a quarterly ENDURANCE e-update which highlights different aspects of the sustainable urban planning process.

Implemented in 25 countries across Europe

The ENDURANCE Network
Cities networking for Sustainable Urban Mobility Planning

Co-funded by the Intelligent Energy Europe Programme of the European Union

www.epomm.eu/endurance
A Sustainable Urban Mobility Plan is a strategic plan that builds on existing planning practices and takes due consideration of integration, participation, and evaluation principles to satisfy the mobility needs of people today and tomorrow for a better quality of life in cities and their surroundings.

**What does the city get from developing a SUMP:**
- Better accessibility for sustainable transport modes
- Improving safety and security
- Reducing pollution, greenhouse gas emissions and energy consumption
- Increasing the efficiency and cost-effectiveness of the transportation of goods and people
- Enhancing the attractiveness and quality of the urban environment

**What mobility planners get from a SUMP:**
- A document to support actions to be carried out
- A framework for the involvement of stakeholders to make mobility planning more efficient and pleasant
- A strong mandate for future actions that everyone has agreed to
- Better dialogue with decision makers

ENDURANCE is a pan-European programme implemented in 25 countries across Europe, which assists cities and regions with developing Sustainable Urban Mobility Plans by facilitating networking, mutual learning and sharing experience and best practice across countries.

- Sharing best practices on a national and European level
- Exchange of knowledge to implement a SUMP
- Support from trained SUMP experts in your own country on how to get started and how to move on with your mobility planning
- Useful tools for implementing SUMPs

**What is a SUMP?**

**What is ENDURANCE?**

ENDURANCE is a European SUMP network implemented in 25 countries across Europe, which assists cities and regions with developing Sustainable Urban Mobility Plans by facilitating networking, mutual learning and sharing experience and best practice across countries.

- Sharing best practices on a national and European level
- Exchange of knowledge to implement a SUMP
- Support from trained SUMP experts in your own country on how to get started and how to move on with your mobility planning
- Useful tools for implementing SUMPs
