

TEMS - The EPOMM Modal Split Tool

Vancouver

Source:

Statistics Canada, 2006 Census, figures are for the Census Metropolitan Area

Survey method:

The census in 2006 asked a sample of 20% of respondents with employment for their mode of travel for the journey to work. These are the only comparable figures for modal split data in Canada.

Year:

2006

Population:

2,116,576
